The Fancy Font Guide for 2026

Fancy fonts are not real fonts: they are special Unicode characters that look like bold, script or gothic letters. Because they are characters, not a font file, you can copy them into an Instagram bio, a TikTok name or a Discord message. This guide shows every style, which apps show them, how to keep your text readable, ideas for bios and usernames, and a checklist before you post.

How fancy fonts work

1. **Type your text.** A name, a username, a bio line or a short caption, up to 200 characters.
2. **Each letter is swapped.** "A" becomes a bold, script or gothic letter from the Unicode maths and symbol blocks.
3. **Copy and paste.** The app shows the new letters with its own font, so the look stays wherever Unicode works.
4. **Some letters stay plain.** A style with no form for a letter, number or accent leaves it as it is.

Where they work

Place	What to expect
Instagram bio, name and captions	Most styles show. Keep your name searchable by also writing it plainly somewhere.
TikTok and X	Most styles show in bios and posts. Some names may limit special characters.
Discord, WhatsApp and Telegram	Most styles show in messages and names.
Games and gamertags	Many games allow letters and numbers only, so test first.
Older phones and some apps	A few characters can show as empty boxes. Pick a simpler style if they do.

Every style, on "Lily Rose"

Style	Looks like	Best for
Bold Sans	𝗟𝗶𝗹𝘆 𝗥𝗼𝘀𝗲	Names and headlines in a bio or caption
Script	𝓛𝓲𝓵𝔂 𝓡𝓸𝓼𝓮	Elegant names, quotes and invitations
Bold Script	𝓛𝓲𝓵𝔂 𝓡𝓸𝓼𝓮	Cursive that still reads at a small size
Double-Struck	𝕃𝕚𝕝𝕪 ℝ𝕠𝕤𝕖	Outlined letters for brand names
Gothic	𝔏𝔦𝔩𝔶 𝔑𝔬𝔰𝔢	Old English look for gaming tags
Bold Gothic	𝕷𝖎𝖑𝖞 𝕽𝖔𝖘𝖊	Dark, dramatic titles
Bold Serif	𝐋𝐢𝐥𝐲 𝐑𝐨𝐬𝐞	Strong, classic emphasis
Italic Serif	*Lily Rose*	A quote or a title of a book
Bold Italic	***Lily Rose***	Emphasis that leans
Sans Bold Italic	***Lily Rose***	A modern, sporty headline
Sans Italic	*Lily Rose*	A light, modern slant
Sans	Lily Rose	Clean text that looks different from the app font
Monospace	𝙻𝚒𝚕𝚢 𝚁𝚘𝚜𝚎	Code, tech and retro posts
Vaporwave	L i l y R o s e	The wide aesthetic look
Aesthetic Brackets	【L i l y R o s e】	Vaporwave titles and usernames
Small Caps	LILY ROSE	Quiet, neat display names

Every style, continued

Style	Looks like	Best for
Tiny Text	ʟⁱˡʸ ʀᵒˢᵉ	Small text above the line
Bubble	Ⓛⓘⓛⓨ Ⓡⓞⓢⓔ	Playful names and stickers
Dark Bubble	🅛🅘🅛🅨 🅡🅞🅢🅔	Bold, round capitals
Squared	🄻🄸🄻🅈 🅁🄾🅂🄴	Boxed capitals like a game tile
Dark Squared	🅻🅸🅻🆈 🆁🅾🆂🅴	Solid boxed capitals
Upside Down	əsoʁ ʎlıl	A playful surprise in a message
Mirror	esoR yliL	The text read backwards
Fancy Wings	彡Lily Rose彡	Gaming and Free Fire style names
Stars	★彡 *Lily Rose* 彡★	A sparkly display name
Sparkles	✨ Lily Rose ✨	A cute caption or bio line
Hearts	♡ Lily ♡ Rose ♡	Love notes and soft aesthetics
Flowers	🌸 Lily Rose 🌸	A spring or cottagecore bio
Spaced	L i l y R o s e	Airy, minimalist headings
Strikethrough	~~Lily Rose~~	A crossed-out joke or a price cut
Underline	Lily Rose	Underlined text where the app has none
Dotted	L·i·l·y R·o·s·e	A soft, decorated word

Keep it readable

1. **Style a few words, not a paragraph.** A name or a heading stands out; a whole bio in script is hard to read.
2. **Keep important words plain.** Search and screen readers read styled letters badly, so your name, links and contact details stay plain.
3. **Pick a style that fits the mood.** Script and double-struck for elegant, bubble and upside down for playful, monospace for tech.
4. **Test it where you post it.** Paste it into the app and look before you save.

Ideas for bios and usernames

1. Your name in Bold Script, then one plain line about you.
2. A small-caps tagline under a plain name, for a clean, quiet look.
3. Stars or Fancy Wings round a gamer name for a display name.
4. Sparkles or Flowers round one short line for a soft, cute bio.
5. Monospace for a coder's or a retro gamer's handle.

Before you post

1. Is your name still easy to find and read?
2. Did every letter change, or did some stay plain?
3. Does it show on your phone and on a friend's?
4. Does the style match what you want people to feel?
