AIFreeForever

The HTML Generator Guide for 2026

A short guide to getting clean HTML from AI: prompt templates, the SEO and accessibility levels, a check list before you publish and the six most common accessibility errors. Use it with AIFreeForever's free AI HTML Generator.

Prompt templates that work

1. **A form.** "Contact form with name, email, subject dropdown and message, with a submit button"
2. **A section.** "Hero section with a headline, one line of text and two buttons"
3. **A component.** "Pricing table with three plans, each with price, four features and a button"
4. **A page.** "Blog post page template with header, article, sidebar and footer"
5. **With style.** Add "with inline CSS" or "responsive" when you want it styled.

SEO and accessibility levels

Setting	Option	What you get
SEO	Basic	Semantic elements and a proper heading order
SEO	Advanced	Title, meta description, Open Graph and Twitter Card tags
SEO	Full SEO	Everything in Advanced, plus schema.org structured data
Accessibility	Standard	Alt text, labels, real buttons and links
Accessibility	WCAG AA	Landmarks, tied labels, visible focus, a skip link
Accessibility	WCAG AAA	AA plus descriptive links and extra help text

Six errors to check (WebAIM Million 2026)

Error	Home pages with it
Low contrast text	83.9%
Missing alternative text for images	53.1%
Missing form input labels	51%
Empty links	46.3%
Empty buttons	30.6%
Missing document language	13.5%

Before you publish

1. **Validate.** Paste the HTML into the W3C Markup Validation Service (validator.w3.org).
2. **Replace placeholders.** Swap the sample text, images and links for your own.
3. **Test with a keyboard.** Tab through every link, field and button.

Plan my HTML

Write what the HTML is for and what it must contain, then type it into the generator.

What it is (a form, a section, a page)

Elements it must contain

SEO level and accessibility level
