How to use this guide

This guide lists 201 websites and apps where people make money online, from AI training jobs that pay by the hour to apps that pay a few dollars a month for small tasks. Each platform appears once, even if it fits more than one way to earn.

Platforms are grouped into chapters by the way you earn, the same as on our site. Inside each chapter they run from easiest to join to strictest, so you can start with the easy ones and work up. Click any platform name or web address to go straight to its sign-up page.

● Easy

Sign up and start the same day.
No skills test, at most a phone or email check.

● Medium

A short qualification step first, such as a profile review, an ID check or a quick test.

● Strict

Expect a real screening: skills tests, interviews, ID checks or proof of expertise.

About pay figures. "Typical pay" is the average reported by each platform or its users. Where Reddit users report their monthly earnings, we show the typical month too. Pay, country rules and entry requirements change often, so please research each platform before joining.

Chapters

01	AI training jobs	60 platforms
02	Get paid for your voice, language & photos	24 platforms
03	Data labeling & microtask jobs	14 platforms
