The Flux Prompt Workbook, 2026

This workbook is for artists, designers and content creators who make pictures with Flux. It covers the six parts of a strong Flux prompt, camera and lighting words that work, which Flux model to pick, and a page to plan your own prompts.

The six parts of a strong Flux prompt

- **Subject:** who or what, what it looks like and what it is doing.
- **Camera:** the lens, the aperture and the angle (85mm, f/2.8, eye level).
- **Lighting:** where the light comes from (window light, a softbox, the low sun).
- **Background:** the place and what is behind the subject.
- **Colours and mood:** plain colour words (warm orange, muted green) and the feeling.
- **Framing:** close or wide, where the subject sits, and the aspect ratio.

Camera and lighting words that work

Portrait	85mm lens, f/1.8, eye level, soft window light from the left
Landscape	24mm lens, f/8, low angle, golden hour, long shadows
Product	100mm macro, f/5.6, overhead, studio softbox, plain background
Street or travel	35mm lens, f/4, eye level, overcast daylight
Night scene	50mm lens, f/1.4, ISO 1600, neon or street lamps

Which Flux model to pick

Flux Dev	Testing ideas and personal projects
Flux Pro	Professional work that needs the most detail
Flux Schnell	Fast results: keep the prompt short and concrete
Flux 2 Pro	Professional artwork with accurate colour
FLUX 3 Klein	Black Forest Labs' newest model, released October 15, 2026

Before you press Generate in Flux

- Is the subject described with real details (hair, clothes, materials)?
- Did you name a lens, an aperture or an angle?
- Does the prompt say where the light comes from?
- Did you swap words like "stunning" for what is really there?
- Does the framing fit the aspect ratio you will use?

My Flux prompt plan

Image idea	Model, style and light	Ratio
